
Screen: Chen et al., Cell 2023 (PMID 37321219). * not previously reported in the literature (author annotation); † in the 134 core targets (ADRA2B only). Direction of expression change vs agonism has not been tested. 11 of the 14 receptors are among the 250 SEA × STP targets (scheme A); only ADRA2B remains in the 134 after the disease-gene filter.
