Pairs whose receptor failed the co-crystal re-docking check (top-ranked pose RMSD ≥ 2 Å for all four ADRA2A structures tried; the best of the nine returned poses is
0.82-1.60 Å, so the failure concerns pose ranking rather than the docking box): supplement only.

A Dopamine – ADRA2A (9CBL)
Vina -6.10 kcal/mol
co-crystal re-dock RMSD 2.01 Å (ALE)

B Levodopa – ADRA2A (9CBL)
Vina -6.92 kcal/mol
co-crystal re-dock RMSD 2.01 Å (ALE)
